Who I've worked with

Dr. Brandon Ashfeld,
Associate Professor, Biochemistry

Prof. Ashfeld has been a research collaborator with me for four years.

"Francisco has established himself as an exemplary researcher and has demonstrated the leadership qualities one hopes to see from a graduate student at such an early stage. A defining characteristic of Francisco is independence and self-reliance in project management at the graduate student level where he has demonstrated a remarkable ability to identify key holes in the literature and develop an approach toward addressing these vacancies as they pertain to our specific objectives."

— Brandon Ashfeld

Skills

Linear regression

Excellent

Generalized linear regression

Excellent

Purpose statement

Deep down I know everyone is created to fulfill a unique role, to be a part of something bigger, and to be the change they want to see. The core mission of my research endeavors is to be someone of service. Helping, guiding, leading, lifting, and caring for others fills my heart, gives me motivation, and creates unbounding feelings of significance. I am driven by my desire to heal, listen to, protect, and love others. To achieve my mission of service, I have found I was created to use my talents of communication, instruction, execution, and discernment to perform my passions of planning, advising, solving, and analyzing by using state of the art biotechnology to discover novel treatment approaches for patients.

How I can add value

- Adaptive data analyst passionate about leading the forefront of biotechnology, drug discovery, and pre-clinical therapeutics through data-driven decision making.
- Self-motivated professional with excellent communication, strategic planning, and problem solving abilities.
- Meticulous research leader adept in data collection, analysis, interpretation, simplifying complexities, and data visualization.
- Acknowledged for excellence in neuroscience and cancer therapeutics research through multiple fellowship and grant awards.
- Committed to a willingness to learn, integrity, and dependability.
- Interdisciplinary educational background has enabled high proficiency in wet-lab data collection and dry-lab data analysis.
- Enthusiastic advocate for organization, time management, responsibility, staying focused, and taking action.
- Passionate leader that values collaboration, listening, patience, encouragement, instructing others, and achieving success together.
- Adept in critical thinking, open-mindedness, and assessing multiple viewpoints to analyze complex issues.
- Animated presenter when sharing and explaining exciting results.

Where I've been

Jul 2018

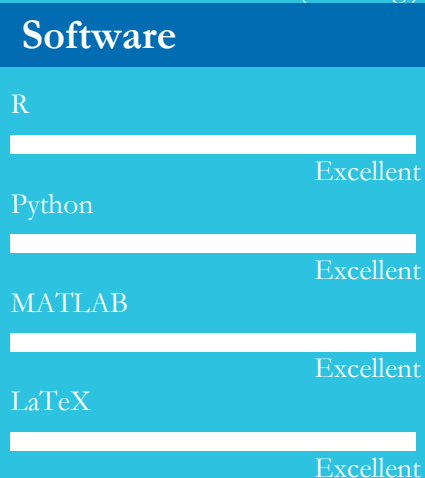

Graduate Research Assistant, University of Notre Dame

Advisor: Dr. Jeremiah Zartman

South Bend, Indiana

Current

- Currently implementing Gaussian process regression to develop a machine learning model that predicts binding affinity of a molecule to a protein.
- Utilized statistical learning for analysis of phenotypic data for rapid in vivo drug screening.
- Developing approaches for machine learning classification of molecular descriptors to identify kinase inhibitors.
- Employed Bayesian inference to identify associating molecular descriptors that explain kinase selectivity.
- Utilized machine learning and neural networks for rapid data classification of calcium activity during developmental processes.
- Utilized differential equation modeling to discover necessary and sufficient conditions for calcium activity in developing *Drosophila* epithelial tissue.
- Performed categorical data analysis and generalized linear regression to discover a relationship between the Gαq protein and cellular proliferation.
- Performed quantitative reverse transcription PCR and analyzed subsequent data to identify low abundance GPCRs not yet recorded in literature.
- Aided in identifying novel neural receptors that regulate epithelial morphogenesis.

- Developed cloning vectors for creating transgenic *Drosophila* lines to optimize a drug screening assay.
- Aided in development of a rapid in vivo *Drosophila* drug screening assay.
- Utilized tissue immunostaining to evaluate protein localization in developing tissues.
- Transfected *Drosophila* cells with a fluorescent calcium reporter.
- Utilized confocal microscopy to image developing *Drosophila* brains and wing discs.
- Developed lecture slides to present to students on cell line engineering to a junior level chemical engineering course.
- Presented on methods, applications, and future direction of cell line engineering.
- Composed homework and exam problems based on lecture material.
- Oversaw, educated, guided, and advised five undergraduate students on laboratory experiments and research projects.
- Maintained laboratory operations, updated and revised standardized operating procedures, and oversaw lab inventory.
- Organized, scheduled, held, and led weekly group meetings during my advisor's sabbatical.

Jan 2017 Undergraduate Researcher, University of Notre Dame

– Advisor: Dr. Jeremiah Zartman

South Bend, Indiana

May 2018

- Utilized the GAL4/UAS system to study in vivo gene expression of *Drosophila* with fluorescent microscopy.
- Developed a more efficient coverslip plating protocol for in vivo calcium signaling imaging that increased throughput two-fold.
- Created a pipeline data analysis program for classification of in vivo imaging data using MATLAB.
- Performed statistical analysis using R to create figures for manuscripts.
- Identified a power-law relationship between calcium signaling and tissue size during development of *Drosophila* using a Box-Cox transformation.
- Improved a genetic screening project to identify key regulatory genes of calcium by developing a data collection protocol.
- Instructed and supervised new graduate and undergraduate students on basic laboratory protocols.
- Completed a thesis detailing significance of calcium signaling in developing tissue.

What I've learned

Jul 2018 Ph.D. Bioengineering

– University of Notre Dame, South Bend, IN

Current

- **Relevant Coursework Completed:** Statistical and computational methods for scientists and engineers; Nonlinear and stochastic optimization; Advanced topics in machine learning; Advanced cell biology; Molecular biology; Stem cell engineering; Systems biology; Biocomputing; Advanced Biostatistical Methods

Jul 2018 M.S. Applied Computational Mathematics and Statistics

– University of Notre Dame, South Bend, IN

Current

- **Relevant Coursework Completed:** Statistical inference; Applied linear models; Intermediate probability; Mathematical biology; Applied Bayesian statistics; Applied generalized linear models

Aug 2013 B.S. Chemical and Biomolecular Engineering

– University of Notre Dame, South Bend, IN

May 2018

- **Thesis:** Regulation and relevance of intercellular calcium signaling in *Drosophila* wing development
- **Minor:** Bioengineering

Aug 2013 **B.S. Applied Computational Mathematics and Statistics**
– *University of Notre Dame, South Bend, IN*
May 2018 • **Concentration:** Biological sciences

Honors

- Berthiaume Institute for Precision Health Summer Graduate Apr 2022 – Jul 2022 Research Fellowship
- 10th Annual Harper Cancer Research Institute Research Day Mar 2022 Presentation Moderator
- Notre Dame CBE Lead Graduate Student Mentor Jan 2022 – Current
- Harper Cancer Research Institute Interdisciplinary Interface Training Jul 2020 – Jul 2022 Program Grant
- Leahy-Filipi Graduate Fellowship for excellence in neuroscience May 2020 – May 2021 research
- Notre Dame Annual Building Bridges Reception Keynote Speaker Sep 2019
- Harper Cancer Research Institute Research Day Oral Presentation Apr 2019 Award
- Stem Cells & Regenerative Medicine Research Fellowship May 2017 – Aug 2017
- Notre Dame CBE Early Start Fellowship Jul 2018 – Aug 2018
- Provost Scholarship for academic achievement Aug 2013 – May 2017
- Kaneb-Gillen Hispanic Scholar for academic achievement Aug 2015 – May 2017
