Who I Know

Dr. Jeremiah Zartman,
Associate Professor

Prof. Zartman has been a research mentor to me for nearly five years.

"Because of Francisco's diverse ethnic background and his current outreach to undergraduates pursuing STEM pathways, Francisco will help lead the next generation of scientists. Over my time as a professor and principal investigator at the University of Notre Dame, Francisco has proved to be a remarkable student and researcher with a bright future."

— Jeremiah Zartman

Skills

Linear regression

Excellent

Generalized linear regression

Excellent

Multivariate analysis

Excellent

Purpose statement

Deep down I know everyone is created to fulfill a unique role, to be a part of something bigger, and to be the change they want to see in the world. In my own journey, I have found I was created to use my talents of instruction, execution, and discernment to perform my passions of planning, researching, and analyzing to accomplish my mission of service by using state of the art biotechnology to produce novel treatments approaches for patients. I am driven by my desire to heal, listen to, lift up, protect, care for, and love others.

How I can add value

- Adaptive data analyst passionate about leading the forefront of biotechnology, drug discovery, and pre-clinical therapeutics through data-driven decision making.
- Self-motivated professional with excellent communication, strategic planning, and problem solving abilities.
- Meticulous research leader adept in data collection, analysis, interpretation, simplifying complexities, and data visualization.
- Acknowledged for excellence in neuroscience and cancer therapeutics research through multiple fellowship and grant awards.
- Committed to a willingness to learn, integrity, and dependability.
- Interdisciplinary educational background has enabled high proficiency in wet-lab data collection and dry-lab data analysis.
- Enthusiastic advocate for organization, time management, responsibility, staying focused, and taking action.
- Passionate leader that values collaboration, listening, patience, encouragement, instructing others, and achieving success together.
- Adept in critical thinking, open-mindedness, and assessing multiple viewpoints to analyze complex issues.
- Animated presenter when sharing and explaining exciting results.

Where I've been

Jul 2018

Graduate Research Assistant, University of Notre Dame

Advisor: Dr. Jeremiah Zartman

South Bend, Indiana

Current

- Currently implementing Gaussian process regression to develop a machine learning model that predicts binding affinity of a molecule to a protein.
- Utilized statistical learning for analysis of phenotypic data for rapid in vivo drug screening.
- Developing approaches for machine learning classification of molecular descriptors to identify kinase inhibitors.
- Employed Bayesian inference to identify associating molecular descriptors that explain kinase selectivity.
- Utilized machine learning and neural networks for rapid data classification of calcium activity during developmental processes.
- Utilized differential equation modeling to discover necessary and sufficient conditions for calcium activity in developing *Drosophila* epithelial tissue.
- Performed categorical data analysis and generalized linear regression to discover a relationship between the Gαq protein and cellular proliferation.
- Performed quantitative reverse transcription PCR and analyzed subsequent data to identify low abundance GPCRs not yet recorded in literature.
- Aided in identifying novel neural receptors that regulate epithelial morphogenesis.

Categorical data analysis	<div><div></div></div>	Excellent
Data organization	<div><div></div></div>	Excellent
Academic presentations	<div><div></div></div>	Excellent
Statistical inference	<div><div></div></div>	Very Good
Documentation requirements	<div><div></div></div>	Very Good
Grant writing	<div><div></div></div>	Very Good
Cell culture	<div><div></div></div>	Very Good
ELISA	<div><div></div></div>	Very Good
RT-qPCR	<div><div></div></div>	Very Good
Bayesian data analysis	<div><div></div></div>	Good (Learning!)
Gaussian Process Regression	<div><div></div></div>	Good (Learning!)
Deep learning	<div><div></div></div>	Good (Learning!)
Case study design	<div><div></div></div>	Good (Learning!)
Immunohistochemistry	<div><div></div></div>	Good

Software		
R	<div></div>	Excellent
Python	<div></div>	Excellent
MATLAB	<div></div>	Excellent
LaTeX	<div></div>	Excellent
Google Drive	<div></div>	Excellent

- Developed cloning vectors for creating transgenic *Drosophila* lines to optimize a drug screening assay.
- Aided in development of a rapid in vivo *Drosophila* drug screening assay.
- Utilized tissue immunostaining to evaluate protein localization in developing tissues.
- Transfected *Drosophila* cells with a fluorescent calcium reporter.
- Utilized confocal microscopy to image developing *Drosophila* brains and wing discs.
- Developed lecture slides to present to students on cell line engineering to a junior level chemical engineering course.
- Presented on methods, applications, and future direction of cell line engineering.
- Composed homework and exam problems based on lecture material.
- Oversaw, educated, guided, and advised five undergraduate students on laboratory experiments and research projects.
- Maintained laboratory operations, updated and revised standardized operating procedures, and oversaw lab inventory.
- Organized, scheduled, held, and led weekly group meetings during my advisor's sabbatical.

Jan 2017	Undergraduate Researcher, University of Notre Dame
–	<i>Advisor: Dr. Jeremiah Zartman</i> <i>South Bend, Indiana</i>
May 2018	<ul style="list-style-type: none"> • Utilized the GAL4/UAS system to study in vivo gene expression of <i>Drosophila</i> with fluorescent microscopy. • Developed a more efficient coverslip plating protocol for in vivo calcium signaling imaging that increased throughput two-fold. • Created a pipeline data analysis program for classification of in vivo imaging data using MATLAB. • Performed statistical analysis using R to create figures for manuscripts. • Identified a power-law relationship between calcium signaling and tissue size during development of <i>Drosophila</i> using a Box-Cox transformation. • Improved a genetic screening project to identify key regulatory genes of calcium by developing a data collection protocol. • Instructed and supervised new graduate and undergraduate students on basic laboratory protocols. • Completed a thesis detailing significance of calcium signaling in developing tissue.

What I've learned

Jul 2018	Ph.D. Bioengineering
–	<i>University of Notre Dame, South Bend, IN</i>
Current	<ul style="list-style-type: none"> • Relevant Coursework Completed: Statistical and computational methods for scientists and engineers; Nonlinear and stochastic optimization; Advanced topics in machine learning; Advanced cell biology; Molecular biology; Stem cell engineering; Systems biology; Biocomputing; Advanced Biostatistical Methods
Jul 2018	M.S. Applied Computational Mathematics and Statistics
–	<i>University of Notre Dame, South Bend, IN</i>
Dec 2021	<ul style="list-style-type: none"> • Relevant Coursework Completed: Statistical inference; Applied linear models; Intermediate probability; Mathematical biology; Applied Bayesian statistics; Applied generalized linear models
Aug 2013	B.S. Chemical and Biomolecular Engineering
–	<i>University of Notre Dame, South Bend, IN</i>
May 2018	

- **Thesis:** Regulation and relevance of intercellular calcium signaling in *Drosophila* wing development
- **Minor:** Bioengineering

Aug 2013 **B.S. Applied Computational Mathematics and Statistics**
 – *University of Notre Dame, South Bend, IN*
 May 2018 • **Concentration:** Biological sciences

Honors

- Harper Cancer Research Institute Interdisciplinary Interface Training Program Grant Jul 2020 – Jul 2022
- Leahy-Filipi Graduate Fellowship for excellence in neuroscience May 2020 – May 2021 research
- Notre Dame Annual Building Bridges Reception Keynote Speaker Sep 2019
- Harper Cancer Research Institute Research Day Oral Presentation Award Apr 2019
- Stem Cells & Regenerative Medicine Research Fellowship May 2017 – Aug 2017
- Notre Dame CBE Early Start Fellowship Jul 2018 – Aug 2018
- Provost Scholarship for academic achievement Aug 2013 – May 2017
- Kaneb-Gillen Hispanic Scholar for academic achievement Aug 2015 – May 2017
